

Make Trade Fair

Mr. Guatemala bureaucrat  
Riding high in first class  
On your way to Miami  
To make a trade deal to save your country  
Free trade will trickle down you say  
But first the big boys get to play  
Eventually, the world will see  
That global free trade is the way it should be

Subsidized commodities  
Flood the markets of poor countries  
Local farmers can't compete  
Imports starve their economy  
When there is no trade or no crop  
The desperate slave in a sweat shop  
It seems like the powers that be  
Are the only people who are free

Come on and make trade fair -- Talk about solution  
Make trade fair -- global revolution  
We could make trade fair, fair  
We could make trade fair

Development loans caused a crisis  
A global drop in coffee prices  
25 million out of business  
No school, no food and their awareness  
That coca is a rich man's wine  
Now coffee withers on the vine  
While coffee conglomerates' profits rise  
The rich kid parties, a poor mother cries

Come on and make trade fair -- Talk about solution  
Make trade fair -- global revolution  
We could make trade fair, fair  
We could make trade fair

Come on and make trade fair -- Talk about solution  
Make trade fair -- global revolution  
We could make trade fair, fair  
We could make trade fair
